## BELGIQA - ARCHITECTURAL WOOD PRODUCTS

With over a century of expertise in the processing and finishing of wood, combined with continuous innovation, Belgiqa offers a truly holistic 360° approach. Perfectly harmonised wood floors, walls, and ceilings enrich both commercial and residential projects. Our entirely Belgian production process makes us a unique manufacturer of premium wood flooring, wall panels, veneer sheets, and cladding, with aesthetics and innovation always at the heart of our craft.

Made in Belgium — Designed for the future

PRODUCT

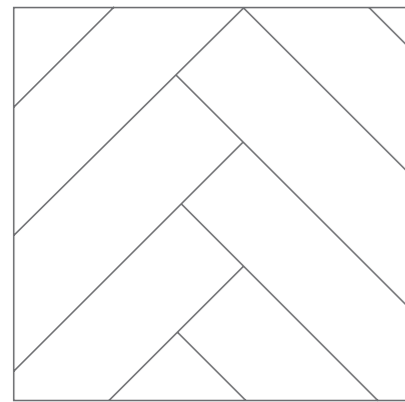

OVERVIEW

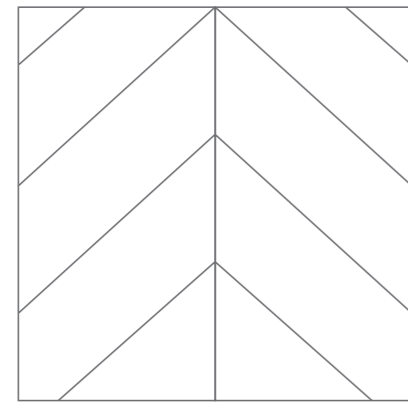

YOUR FLOORING SHAPES THE ENTIRE ATMOSPHERE OF YOUR INTERIOR. ITS IMPACT IS ENORMOUS, AND THE POSSIBILITIES ARE ENDLESS. THE CHOICE IS ENTIRELY YOURS.

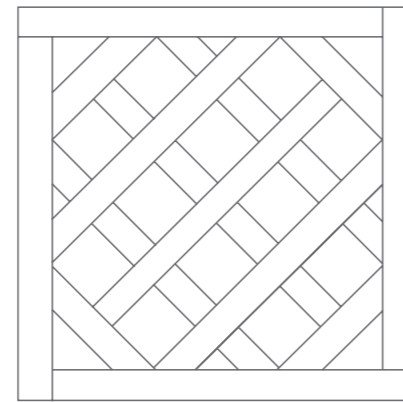

▲ At Belgîqa, you will find only the finest wood flooring, crafted to your exact specifications

HERRINGBONE

CHEVRON

VERSAILLES

## FLOORS

Select from an extensive range of wood species, patterns, and colours. Explore refined weathered tones and distinctive reactive effects that reveal the true character of the wood. Oak, Douglas fir, walnut, or elm: extra wide or extra long? With Belgîqa, your floor is always made uniquely for you.

### veneered panels

Our veneered panels are crafted for seamless large-format wall coverings or furniture applications, offering a sophisticated solution for any interior. They are available in various grades and can perfectly match our floors or other products.

### veneered planks

Our veneered planks are the ideal complement to our wood flooring, creating a unified and refined aesthetic throughout your interior. Combining these elements elevates your space to a new dimension of style and cohesion. To be used for walls and ceilings, our veneered planks are available in multiple grades and an extensive palette of colours, ensuring a flawless match with your design vision.

### flexible veneer

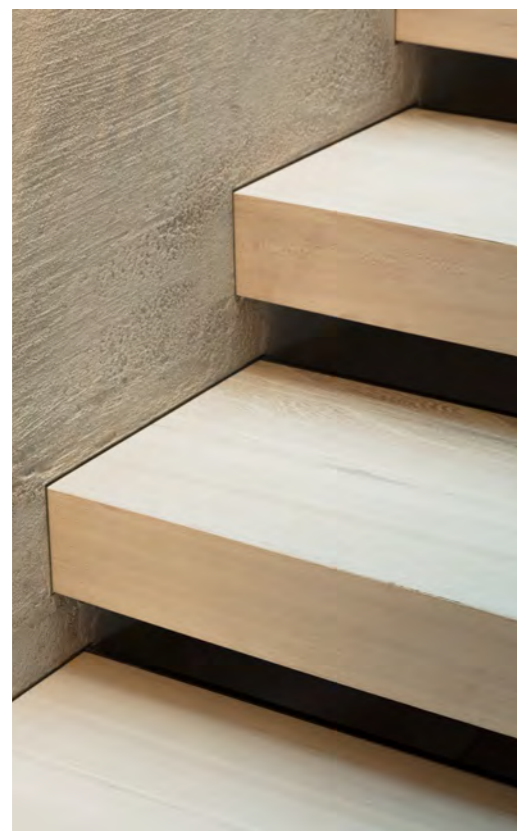

Our flex sheets form the perfect finishing touch for high-end furniture and bespoke interior detailing. They are lightweight, bendable, and simple to apply. At the same time, they capture the natural beauty of real wood while offering the versatility to follow curves, edges, and even complex shapes.

## STAIRS

Are you looking for a (solid) staircase that blends seamlessly with your floor?

At Belgica, we make it possible. We ensure a smooth transition by matching every element: stair treads, risers, and even floor grilles and heating vents. Each detail is finished to align perfectly with your floor or wall.

LET YOUR PROJECT ACHIEVE A FLAWLESS SENSE OF COMPLETION. ENTRUST US WITH YOUR STAIRCASE, WHERE COLOURS ARE CAREFULLY HARMONISED TO CREATE THE BALANCE AND ELEGANCE NO INTERIOR SHOULD MISS.

## FASSADE

Fassade redefines wooden cladding, bringing sustainability, durability, and design into perfect balance. It is crafted from fast-growing species such as Abechi, Pina, and Limba. Each comes in multiple profiles and colours, giving you endless design possibilities.

Thanks to the patented Duricoat® process, the wood achieves superior resistance to scratches and moisture. This ensures both long-lasting durability and graceful ageing over time. Fassade is an eco-friendly alternative to tropical hardwood, created through sustainable treatments and responsibly sourced materials.

## DECKING

The collection combines the timeless luxury of tropical hardwood with the values of modern sustainability. These dense and high-quality woods are naturally resistant to moisture, fungi, and insects. This guarantees reliable performance for many years. Depending on the species, they last between 20 and 100 years. During that time, they offer a warm and refined character that elevates any outdoor space.

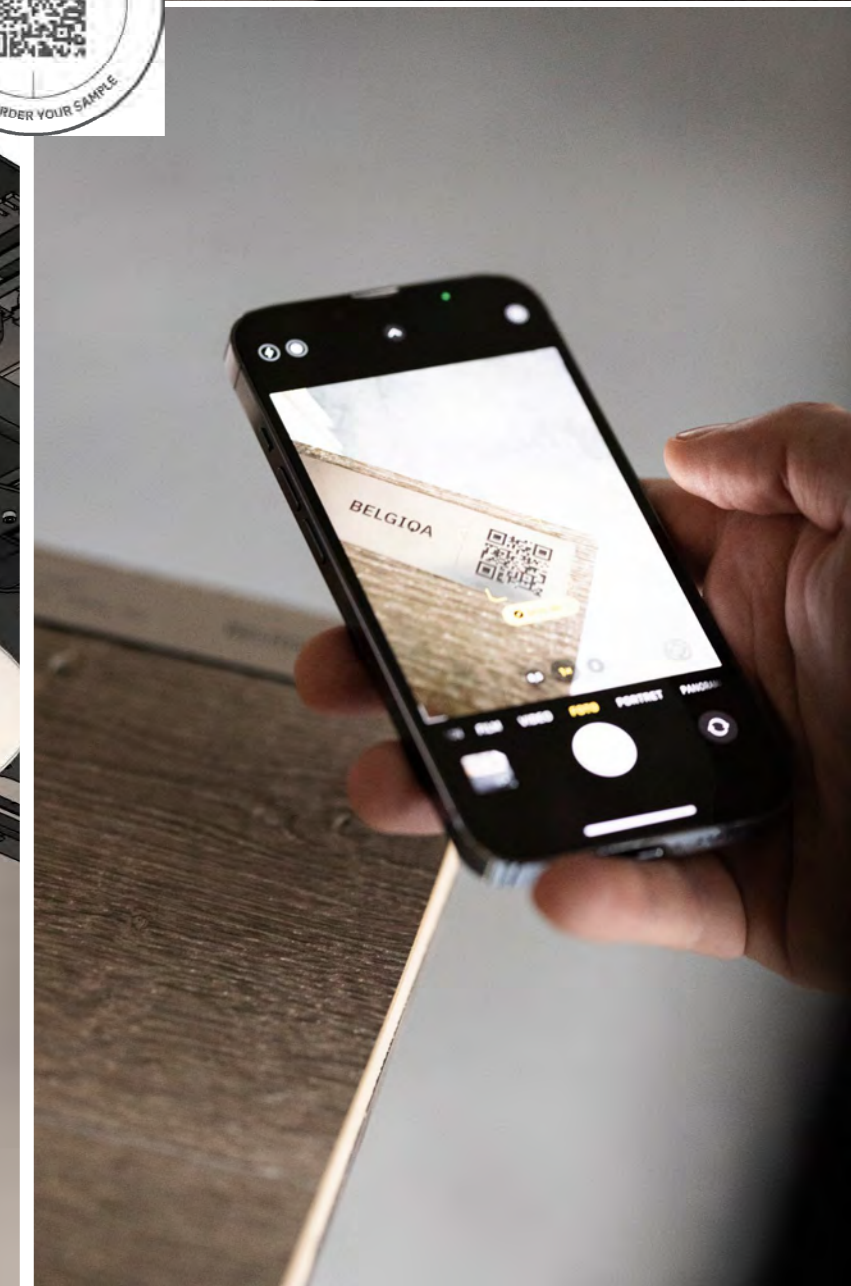

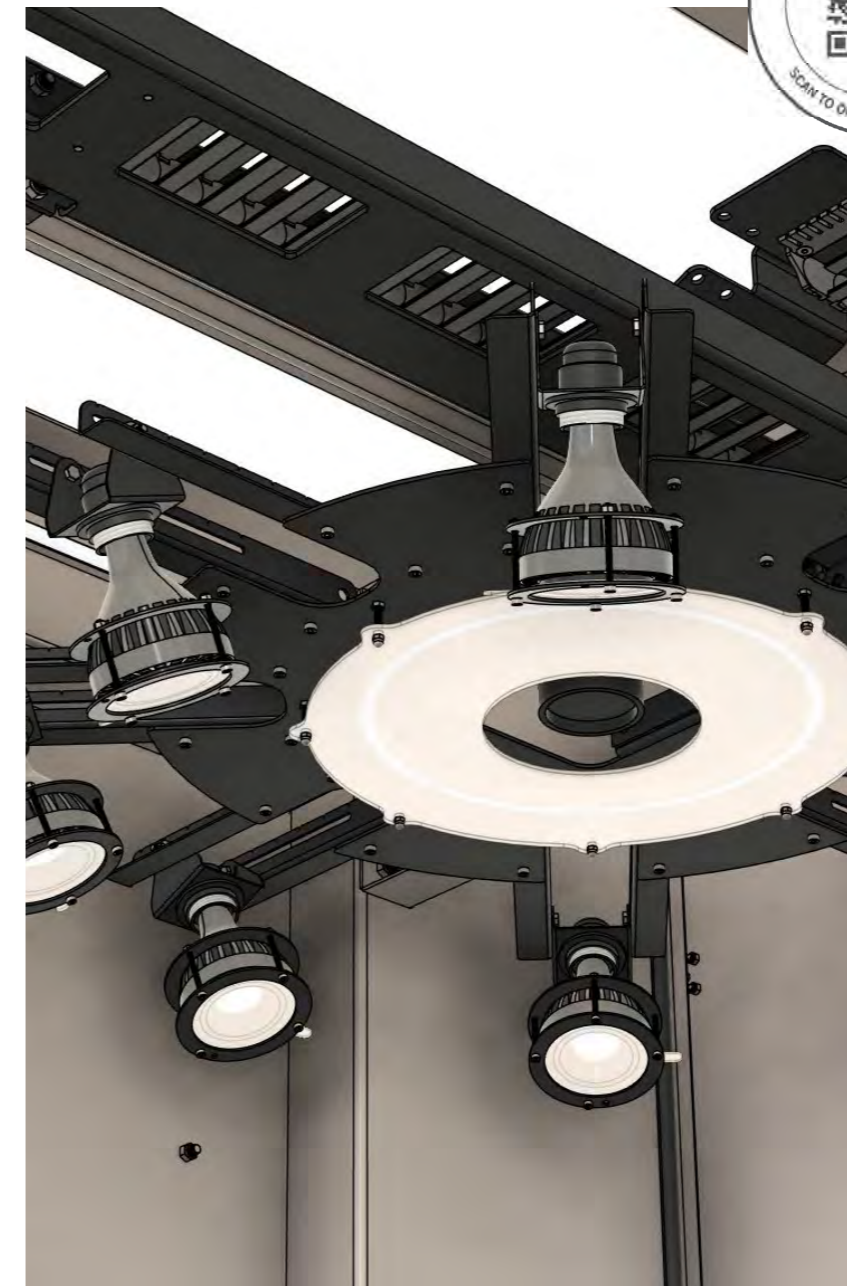

WHERE  
INNOVATION  
BRINGS  
TEXTURES  
TO LIFE

## GET YOUR TEXTURES

At Belgica, we are always seeking new ways to make the creative process easier and more inspiring for architects and designers. Our brand-new online configurator takes this ambition one step further. In our factory, every product is scanned and transformed into a digital twin: a hyper-realistic version of our engineered floors, veneer panels, and wall and floor coverings.

These 3D textures integrate directly into design software such as SketchUp, Revit, and similar tools. This allows architects to work with the exact colour, pattern, and finish of our products, giving clients a true-to-life preview of the final result. The configurator makes it simple to test ideas, compare options, and present designs with full confidence to your customer.

# MISSION

We design and manufacture premium, sustainable wood products with refined finishes. Thanks to vertical integration, technological innovation, and generations of craftsmanship, we deliver solutions that are both reliable and scalable. Customers around the world trust our products.

# VISION

Our commitment centres on quality, reliability, and sustainability. Every floor, wall, or ceiling covering we create embodies our standards of craftsmanship and trust. Building on innovation, sustainability, and tradition, we deliver more than products: we provide inspiration, assurance, and an experience that consistently exceeds expectations.

ARCHITECTURAL WOOD PRODUCTS  
MADE IN BELGIUM - DESIGNED FOR  
THE FUTURE

▲ Our Belgioa Lab subjects every product to rigorous testing, continuing until absolute perfection is achieved.

### ALWAYS ONE STEP AHEAD OF THE MARKET

With our own laboratory, in-house experts, and a complete range of machinery, we develop innovative solutions that are fully tailored to each project. By working closely with architects, we can swiftly translate new trends and challenges into concrete samples and finished products. This way, we remain ahead of the market and ready for the future.

## QUALITY YOU CAN RELY ON

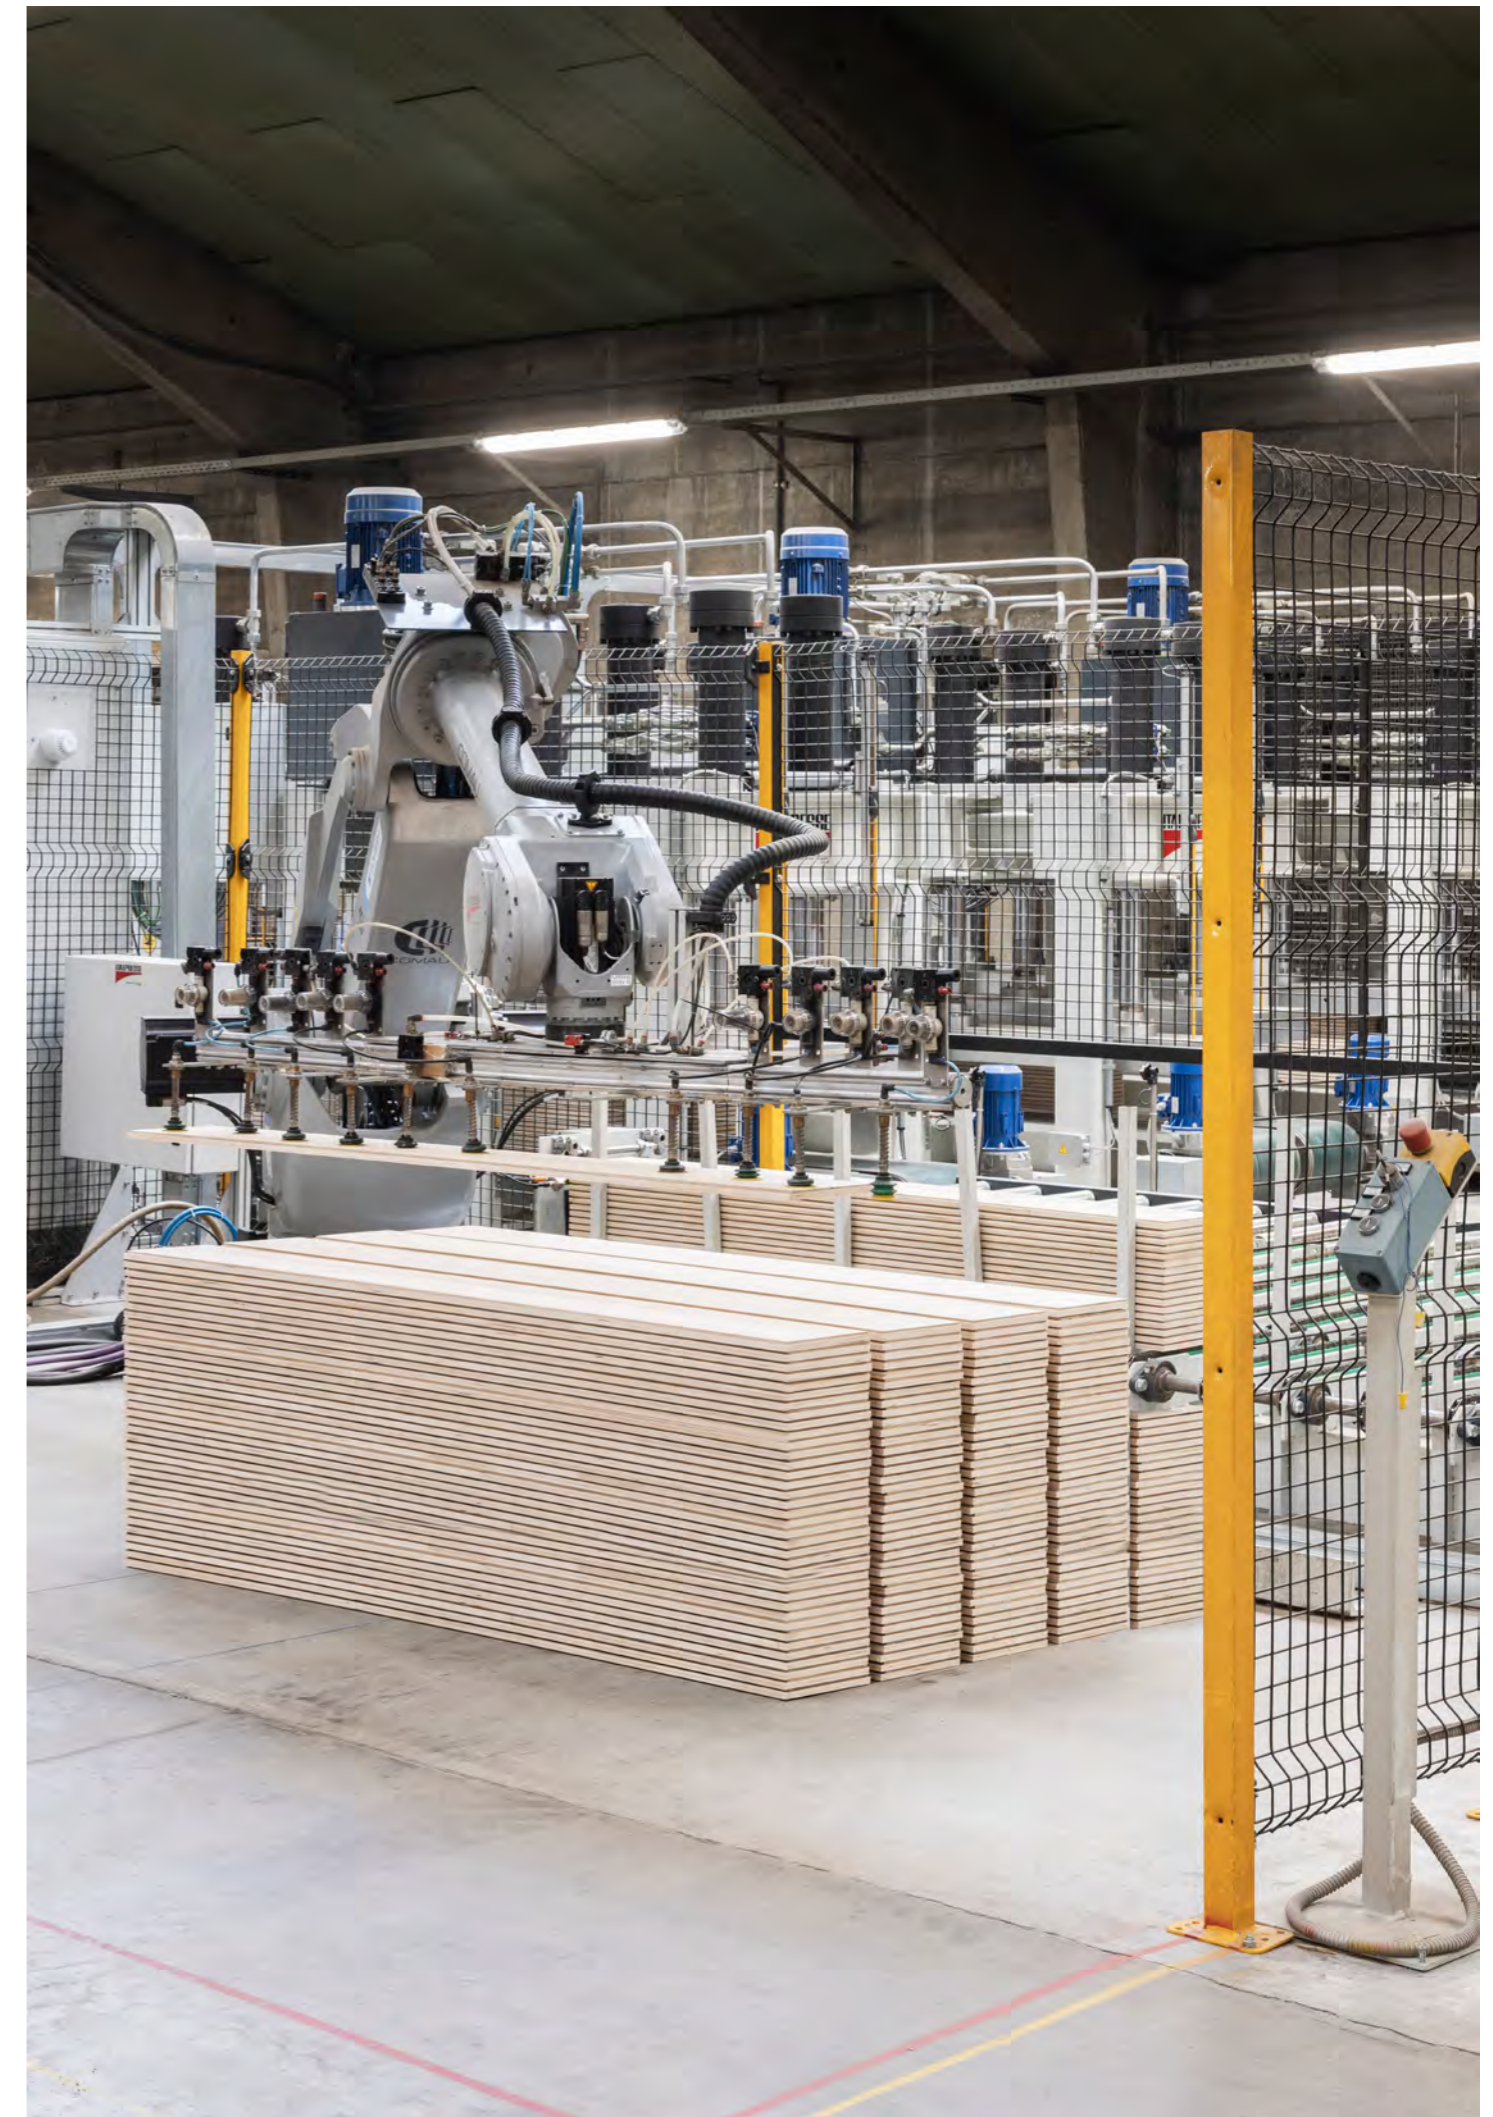

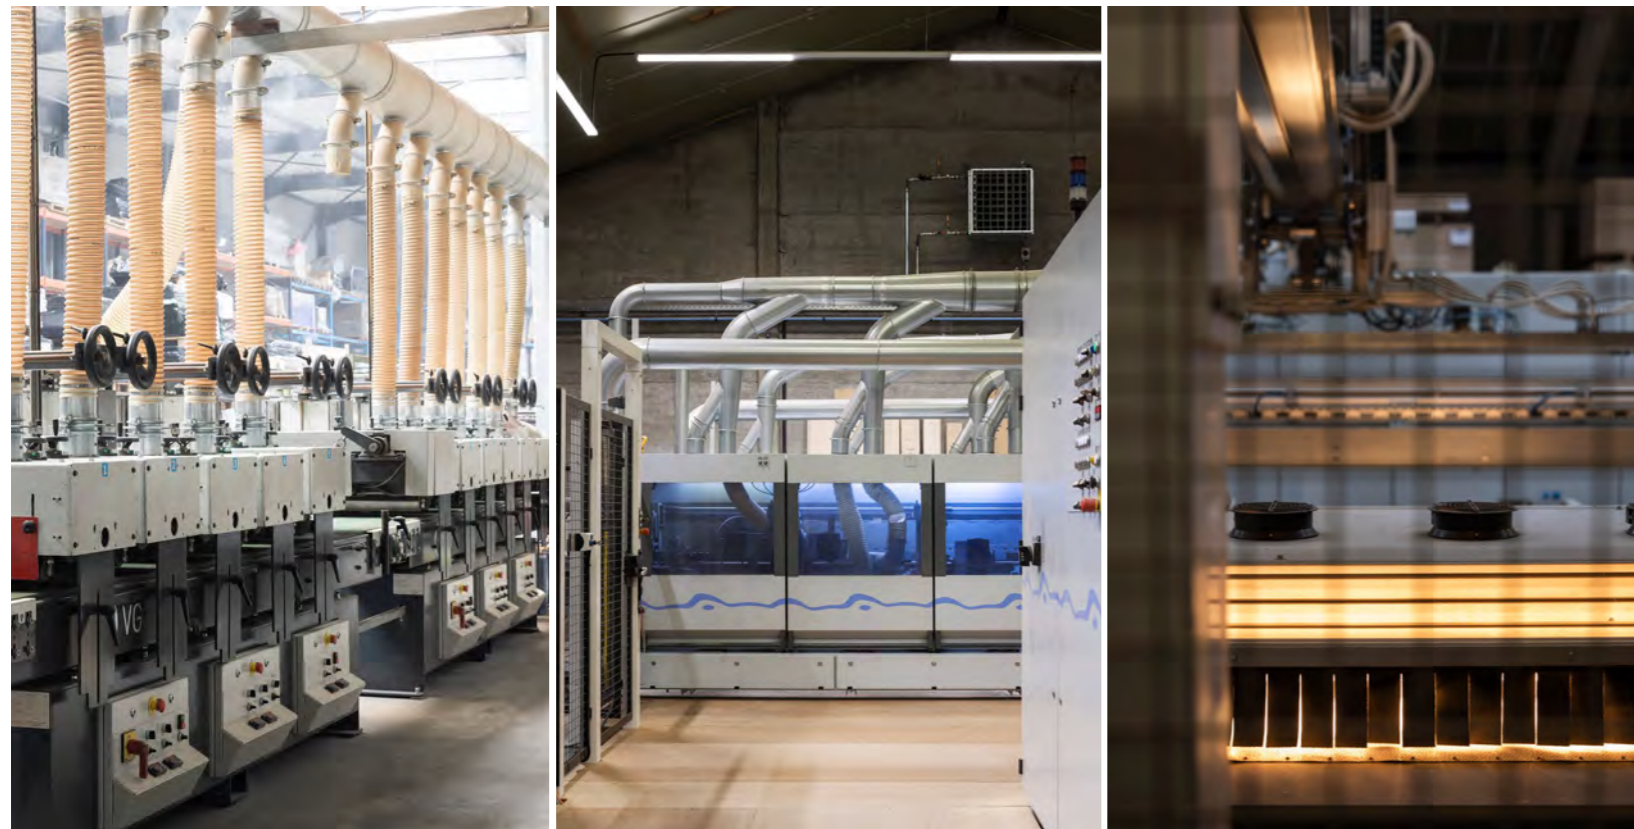

For us, quality is not just a word. It is present in every detail. We work exclusively with carefully selected premium woods that ensure a stable and reliable foundation. Throughout production, CNC-controlled machinery and humidity-regulated buildings guarantee precision and consistency.

Our finishes are designed to resist stains and wear, while remaining easy to maintain. This means your product will look impeccable today, tomorrow, and for years to come. Every piece undergoes strict quality control. CE certification, consistent colours, and a flawless fit are always guaranteed. For each production run, we create a detailed inspection sheet, complete with photos of the finished product and of the correctly loaded transport. These records are kept for six months after delivery, giving you certainty and confidence in the process behind your product. Above all, our professionals unite advanced technology with authentic craftsmanship. Only when every detail is correctly done, we call it quality!

## FOUR GENERATIONS OF CRAFTSMANSHIP

Our expertise is rooted in four generations of craftsmanship and more than a century of experience in wood processing. With the help of advanced machinery and techniques such as cold glueing, we create floors with a flawless fit, minimal deviations, and excellent stability.

Each plank is selected by hand, with precise thickness and hand-selected gradings to reduce colour variations to the absolute minimum. Our deep knowledge of products, colours, and chemistry allows us to deliver truly exceptional results. We also provide a lifetime guarantee on our floor platforms, based on strict installation and drying conditions. Combined with our technical advice and on-site guidance, this ensures a flawless outcome and an impressive 99% customer satisfaction rate, every time again.

OUR AMBITION IS NOT TO BE THE LARGEST, BUT TO EXCEL AS THE BEST – QUALITY ABOVE ALL.

## BECOME A BRANDSTORE

Choosing Belgiqa means choosing a reliable partner with over a century of craftsmanship and innovation in wood. Our core values —integrity, respect, transparency, and commitment— form the foundation of long-term partnerships.

- Premium wood products, Made in Belgium
- A wide and distinctive range, everything from a single manufacturer
- Craftsmanship combined with high-tech precision
- Fast and flexible deliveries
- Strong marketing and sales support
- Generations of expertise with personal guidance
- Sustainable and trusted brand

With Belgiqa as your partner, you give your customers more than floors, walls, or ceilings. You offer them a complete experience: quality, confidence, and architectural value.

## VISIT OUR SHOWROOM

### BELGIQA

You are welcome to visit our production facilities in Belgium to feel our drive for perfection and innovation.

We have created an inspiring showroom space where our collections and innovations come to life. Every day, we welcome clients to explore the latest designs and discover new possibilities.

Belgium

## SEAMLESS PRODUCTION PROCESS

Thanks to our vertical integration, every product is conceived and crafted entirely in-house. This gives us full control over quality, ensures short delivery times, and guarantees a production process that is both sustainable and efficient. From start to finish, everything remains in our own hands, so you can always rely on transparency and trust.

## AN ASSORTMENT WITHOUT LIMITS

Our collection is designed to offer maximum flexibility while preserving consistency and quality. With an extensive range of styles, patterns, widths, colours, and finishes, you will always find the perfect match for your project. From modern and minimalist to warm and timeless, our assortment has it all.

What sets us apart is simplicity. You no longer need to work with multiple brands or suppliers. As a single manufacturer, we provide everything under one roof: clear, consistent, and straightforward. And because every product is proudly "Made in Belgium", you enjoy the perfect balance of sustainability, craftsmanship, and international allure.

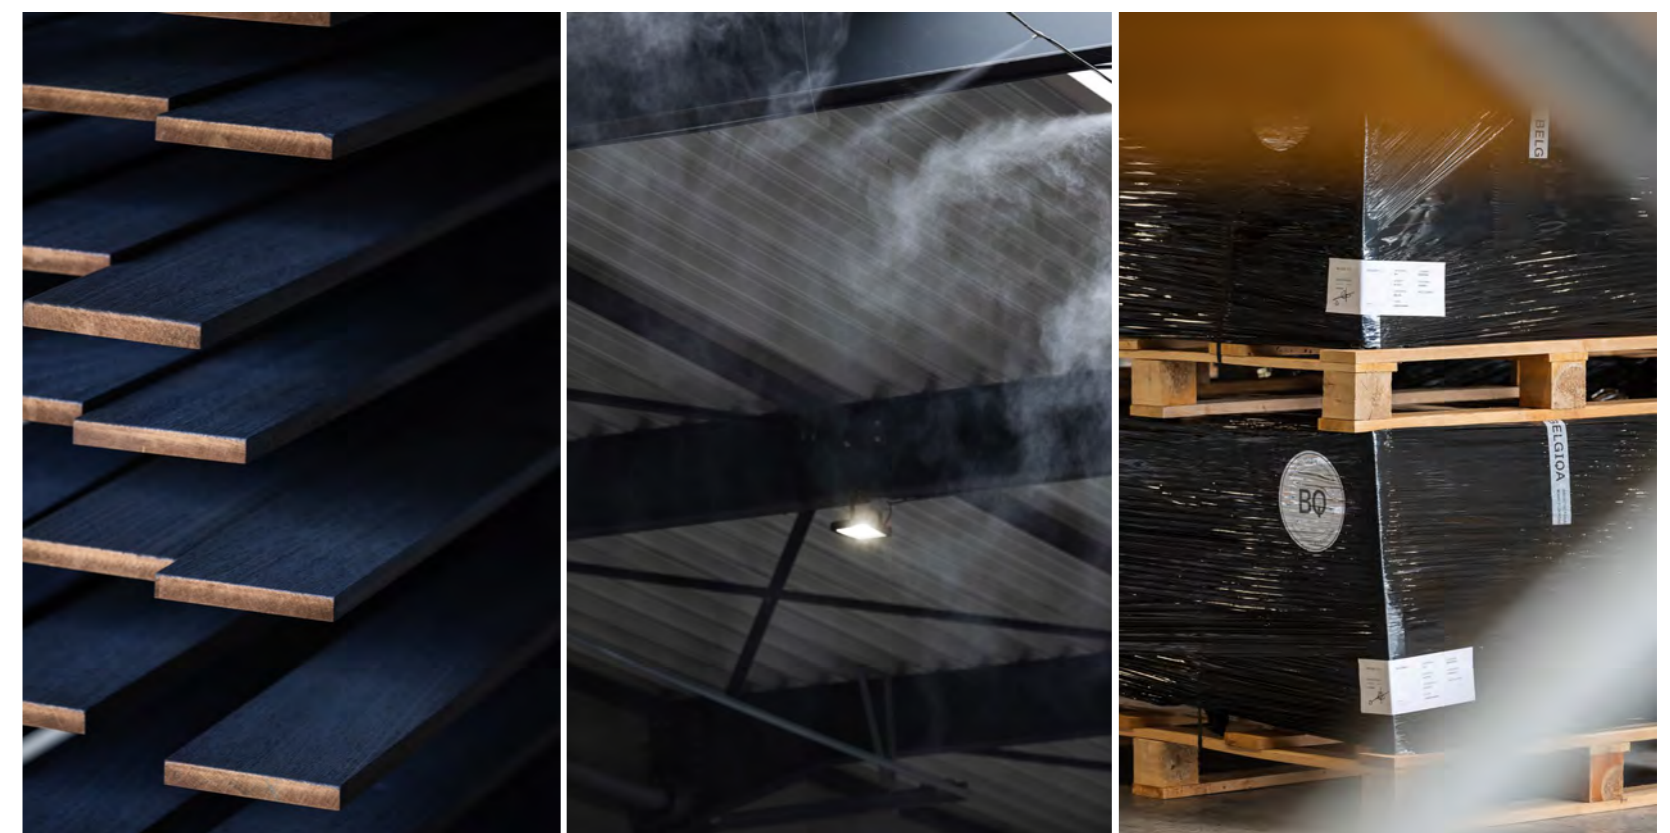

Our designs add genuine architectural value, offering exclusive looks and "du jamais vu" creations that elevate spaces to a higher level. The range is suitable for a wide variety of applications: residential interiors, retail spaces, hotels, and large-scale projects. We also adapt to any production volume, whether 10 m<sup>2</sup> or 3000 m<sup>2</sup>, while ensuring fast and dependable delivery. Together with a 360° experience, we offer not only products but also inspiration, confidence, and a complete service for every client and every project.

## COLLABORATION WITH ARCHITECTS IS OUR DRIVING FORCE FOR INNOVATION

Challenging designs inspire us to create technical and aesthetic solutions that constantly push boundaries. With our own laboratory and in-house machinery, supported by a team of full-time technicians, we respond swiftly and deliver tailored results. Concretely, this means prototypes or custom samples within three weeks, always in line with international trends and the specific needs of each project. In this way, we deliver not just products, but innovative solutions that make every project stand out.

## TAILORED ADVICE, FULLY CUSTOMISED TO YOUR PROJECT

Our guidance goes far beyond standard answers. We support you from the very first concept, offering technical insights while respecting your budget. Through value engineering, we optimise every detail to ensure efficiency, quality, and cost balance. At the same time, we never lose sight of the bigger picture. Our solutions are scalable, future-proof, and always tailored to your specific needs. This ensures your investment delivers results in the short term and long into the future.

**Belgiqa's growth is driven by strong partnerships that support both our products and our brand.**

We work with dedicated dealers who share our 100% commitment, and in return we uphold our promises with equal dedication. Together, we pursue one clear goal: shared growth through international expansion.

**When we say the possibilities are endless, we mean it.**
